

## ABSTRACT OF THE DISCLOSURE

When a changeover instruction is input to video  
output changeover control section 108, power control  
5 section 112 turns on the power to changeover target video  
output section 102. Timing change section 111  
synchronizes sync signal Y output by changeover target  
video output section 102 with sync signal X output by  
changeover source video output section 101. Power  
10 control section 112 turns off the power to changeover  
source video output section 101.
